***“Support Legislation Today for the Workers Exposed
to Toxic Dust during the 9/11 Cleanup!”***

On September 11, 2001, New York City changed as we know it. The Terrorist attacks on the World Trade Center Towers not only took the lives of Rescue Personnel and Financiers, but also members of the Building & Construction Trades Council of Greater New York. The local unions of the Building & Construction Trades Council of Greater New York lost 62 members on that fateful Tuesday.

In the days and months following 9/11 it was the members of the Building & Construction Trades Council of Greater New York who were called upon by the city to work in both the rescue and recovery operations that followed. As we continue to mourn our fallen brothers and sisters it's important to remember their sacrifice. We must never forget them and our role in building the Freedom Tower will be an enormously important project for us. Visit our website to stay current on the news regarding the Freedom Tower as well as the Medical Treatment for those exposed to toxins.
